INFORMATION

A-TARREST FA

.25X1

25X1

- 1. The Naval Base of Vlone Saseno is administratively under the jurisdiction of the Coastal Defense Directorate which has its headquarters in Durres, and is known as Coastal Artillery Brigade.
- 2. The coastal defense is responsible for the defense of the long coast of Albania, from North to South, as well as for the defense of the Island of Saseno.
- 3. The Naval Base of Vlone Saseno has two smaller bases, i.e.:
 - a) Vlone, and
 - b) Saseno.

there are, in Vlone, under construction certain projects which are connected with the establishment of a submarine base. This base is to become a secondary (auxiliary?) base for the Albanian Navy.

5. <u>Island of Saseno:</u> It is a small barren island, with an area of about three square kilometers, located at a distance of about 3 miles north of Cape Linguetta (Akrokeravnion) of the Albanian Northern Epirus.

It is a strategic point for the Ionian, and the Adriatic Sea, and is also a strong bastion of the Gulf of Flone.

On the eastern side of the island, there is a carriage road stretching from North to South, and serving military purposes.

The highest point of the island is marked by an altimeter of 331 meters. There is a coastal observation post on it.

Saseno is a submarine base on which certain prejects have been constructed, and are still going on.

SECRET

ULUIL

SFERET

25X1

6. ARMAMENT

- a) In Vlone there are 5 coastal batteries.
- b) In Saseno, also, there are 5 coastal batteries.

The guns used there are Russian guns, anf former German guns, all of which were provided recently by the Soviet Union. The caliber of the guns is from 106 to 175 mm.

- 7. RADAR. There are no clear indications of use of Radar by the Albanian coastal defense.
- 8. Coastal observation posts of bases.
 - At altitude 331 on Saseno.
 - At altitude 826, 817, and 116 of the Keravnia (Rreza e Kanalit) mountain, and the area of the Gulf of Vlone.
- 9. Ammunition Depots.

There are artillery, and infantry ammunition depots in Vlone, and in Saseno.

10.	Barriers	- Minet	Shlaf

- at the entrance of the Gulf of Vlone, is still and in use.
- The passage along the barrier is marked by buoys which allow an opening of about 80 meters. The opening is at a distance of 150-200 meters from the chast.
- It seems improbable that there is a minefield at the entrance, as well as in the Gulf of Vlone.

11.	FORTIFICATIONS			
	There are perm	anent fortifications in	n Vlone	

The construction of fortifications as bloing on, under the supervision 25X1

fortifications on the Island, were completed, and improved, by batteries, and by other projects of semi-permanent and permanent fortifications under the supervision of Soviet techniques.

12. MANNING.

In time of peace, the defense of Vlone, and of Saseno is entrusted to one Border Guards Battalion of 350 men. In time of war, however, two Infantry battalions, of complete combat composition, are assigned to Saseno.

13. IMPORTANCE OF THE BASE.

It is rumored that the Naval Base of Vlone - Saseno is to be organized so as to accommodate 30-50 submarines with which the communications in the Adriatic Sea, and the Mediterranean Sea will be controlled.

This information is subject to further checking, as much as possible. Other information also is being collected.

A. PORT VALONA

I. The Scala Area

a) Pier

The pier at the scala, has a total length of about 180 meters. Its end part that is about 30 meters long, and at which the draughts are about 22 feet, is used for loading and discharging ships of up to 3,000 tons D.W. Due to smaller draughts, the remaining part is used by smaller ships. The pier is built on poles, and its floor all around is made of concrete, whilst in the middle its is made of dirt.

	There are no fixed cranes of the pier. 3 cranes of
	about one (1) ton each, that were being pulled by automobiles, and
	that were operating with the aid of the engine of the automobile.
	A fixed red fanal was observed at the end point of the pier. At a
	distance of 800-1,000 meters South of the pier,
	fanal (spark) marking the position of a wrecked ship.
ъ) <u>Factories</u>
	A factory producing asphalt, was observed at a distance of about
	500 meters from the coast, on the right hand side of the road from
	the Scala to the city. trucks loaded with asphalt,
	leaving the factory. At about the same distance, but on the left
	hand side of the road, a large factory, rather a
	cannery, that was surrounded by a wall. The wall along the road, was
	about 150 meters long. Rehind it, a water tower
	and a pyramidal square smoke-stack that was not very tall.

III. Merchant Ships Observed

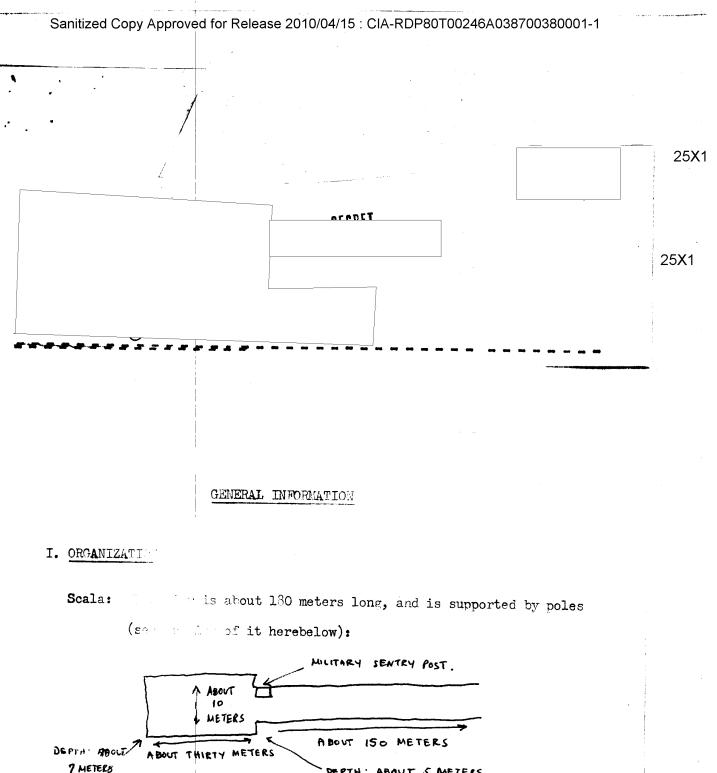

A Soviet freighter of about 2.500 holds was observed docked at the south Sanitized Copy Approved for Release 2010/04/15: CIA-RDP80T00246A038700380001-1
